## The conference

Some time ago **Tekniska** Started to build the concept of **Tekniska ECO-System and CyberTekHub**. We had four goals to become what we call being a TRUSTworthy partner for critical infrastructure operators.

**great tools & solutions**

**great team of the highest competence**

**a platform of teaming experts from different sectors: verticals, science, industry for sharing knowledg and raising awareness**

**taking care of the supply chain by creating internal policies and partner recommendations**

We want to work with best and most flexible companies sharing the same values, and this is the message that we are sending out.

We see a bigger goal which is raising awareness and bringing tailored and optimal solutions together with knowledge and best support for our customers.

We are proud to announce that on the **20-21st of May 2019** in the **International Congress Centre in Katowice** we will organize **CyberTek Conference**.

CyberTek conference will be an event focused on cybersecurity in OT /ICS and industrial data communication.

This conference is not to show Tekniska or solutions itself – this conference is a real platform for knowledge&experience sharing. It is going to be a professional technical event.

Our philosophy is to talk about methodology, share practical knowledge about Defence in Depth philosophy, building tailored cybersecurity architecture in an OT environment, show tools as bricks to create it in the right way.

Our target is to gather ~200 people from Energy, Gas, Rail, Manufacturing, Mining, Machine Builders, Water Utilities and some other smaller parts of ICS world.

Everybody is discussing Cybersecurity nowadays, and we are building a platform to be able to have an essential voice in it.

**Join Us!**

## We will talk about:

- what „safe“ and „secure“ means when it comes to networking, building a network and remote access
- management of process – designing, building and maintaining cybersecurity architecture
- major problems vs. experience from different parts of the world and different verticals
- how to choose your tools wisely and in what order
- education – how wargames can help to raise awareness, leveraging knowledge and teaming, also making training more engaging
- incident response
- security assessment vs. audit
- SOC – when you need your own when SOC as a Service could be enough
- practical show and workshops – budget planning, technical shows/demos
- basic risk assessment
- company policies: sharing information, responsibility path, action plan
- how to hack industrial control systems
- attackers modeling
- attacks anatomy
- trends – cybersecurity horizon
- how to speak with your board of managers?
- how to talk with your IT/OT team?
- standards as a baseline
- secure by design
- supply chain threats and how to mitigate them
- how cybersecurity scope differs for different verticals and what lessons learned can be used elsewhere

## The Conference:

The conference will have plenary sessions including key-note lectures and demo wargame session, Two independent tracks – one for managers, other for networking and security engineers including workshops and technical shows.

We are also planning: discussion - expert panels, B2B meetings, lightning talks and special networking evening event.

There will be an after-party for VIP guests, speakers, Gold and Silver partners of the conference.

There is an elegant exhibition & networking space for Gold and Silver partners.

CyberTek will be a unique opportunity to show your company policies, solutions, and view on cybersecurity and industrial data communication and also learn and share the experience with others.

# Few independent experts already confirmed:

## Clint Bodungen

ICS Security/Risk Professional | Published Author & Public Speaker  
Advisor/Trainer | Hacker/Innovator | Game Developer

Clint Bodungen has over 23 years experience as a professional Cybersecurity Researcher, Risk Analyst, Penetration Tester, and Developer (15+ years specialized in ICS/SCADA Cybersecurity). He has a comprehensive experience in every facet of a cybersecurity project/program and SDLC, from writing code, to penetration testing, and executive leadership.

## Rami Efrati

Managing Partner at Strategic Consulting Partners (SCP)

Strategic consulting and planning with a focus on innovation and cyber-security. Experienced Founder and an expert in Innovation & Cyber Technology Strategic Methods. Brig. Gen. (Res.) Rami Efrati is the former Head the Civilian Division of the Israel National Cyber Bureau in the Prime Minister's Office.

We already have confirmed special prelections from experts on different industries (Energy, Gas, Rail)

Call for papers for Universities and Industry will be opened soon.

We will reveal next Speakers  
of the **CyberTek** soon.
