

CyberTek Tech Festival 2024 is coming. Get ready for a May marked by #cybersecurity

Is knowledge enough to secure industry and critical infrastructure from cyber threats in the face of an ever-changing digital landscape? The answer is simple: it is not enough. Only the wisdom gained from years of experience and collective understanding allows us to stay one step ahead of malicious actors.

Join the CyberTek Tech Festival 2024 - a celebration of the fusion of knowledge and wisdom. We have created a platform to exchange ideas, share best practices and discover innovative approaches to OT/ICS cyber security.

Coming up on 14-16 May at the Silesian Museum in Katowice are:

- A variety of thematic tracks (technical, organisational and research) to help you look at cyber security from a holistic perspective.
 - Presentation of best practices and current trends in ensuring the security of OT (and non-OT) systems and preventing attacks on critical infrastructure.
 - Practical demonstrations of technical solutions.
 - Substantive talks by experts and special guests from around the world - including pictorial case studies.
 - Debates with OT cybersecurity experts and live discussions to keep you fully engaged.
 - Practical on-site workshop sessions for those interested in putting the knowledge gained into practice.
- ...and much, much more.

CALL FOR PAPERS:

Want to share your knowledge by presenting in front of a group of specialists in your industry? Become a speaker. Send your application by 30 March 2024. - www.cybertek.com.pl/cfp.

TICKETS:

Buy a ticket for CyberTek'24 until 15 March 2024 at a lower price! In this round of tickets, you benefit doubly - buy your entry at a cheaper price and secure your accommodation at a convenient distance and price, together with your festival ticket - <https://tiny.pl/c8hv4>.
