Tech Festival 2025 Dates Confirmed

We are excited to announce that the **CyberTek Tech Festival 2025** will take place from **May 27-29, 2025** at the Silesian Museum in Katowice.

CyberTek was born out of a growing need to continuously enhance technical skills, share knowledge and experiences, and improve collaboration in the field of OT cybersecurity across organizations. It has become one of the most notable events of its kind in Poland, attracting hundreds of top-tier experts, practitioners, and academics from around the globe in the field of cybersecurity over the past four years.

The event will focus on two primary thematic streams:

- **ICS Cybersecurity**
- **Industrial Networks & Technology**

The conference will feature insightful presentations, expert panel discussions on cybersecurity and industrial networks, live discussions with opportunities for participant engagement, and speeches from prominent guests from both Poland and abroad.

Additionally, attendees will have access to practical, on-site workshops aimed at applying newly acquired knowledge in real-world scenarios, along with exciting ThreatGen competitions and a technical "playground" showcasing a variety of solutions available for hands-on testing.
